

Everything you need to know about...

STAGING

STOCK STANDARD AND CUSTOM BUILT STAGING

We can make our stages to virtually any height you need, and we have plenty available to provide any size surface area.

The staging is rated at 750Kg per square metre and can be quickly erected on site.

Stages can be designed to provide multi-level tiers, suitable for choirs, elevated sections, or for product placement, or create an extension to an existing stage or structure.

We can even cover the staging in white vinyl for that fashion event or catwalk to create a stunning visual effect.

Need some advice?

Get in touch with us now and we'll help you STAGE the perfect setup!
